Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 March 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 recites the limitation "comprised between 3% and 27% over prior art centre-to centre distance values" in lines 3-4 is unclear. The claim language is unclear. Appropriate action is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Borel (US Patent No.6, 340,164).

Regarding claims 1, Borel discloses the following elements:

- Footwear (fig 3, element 7)
- Chassis (fig 2, element 5)
- Plurality of wheels (fig 1, element 6)
- Footwear provided on bottom with sole (fig 3, element 3)
- 1st and 2nd binding points (fig 3, elements 21 and 24)
- First binding point attached at heel piece (fig 3, element 17)

Art Unit: 3618

- Second binding point attached at toe piece (fig 3, element 22)
- Oversized wheels (fig 2, element 6)
- Fastening means for joining footwear to chassis at 1st and 2nd binding points (fig 3, elements 17 and 22)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Borel (US Patent No.6, 340,164).

Regarding claim 2, Borel discloses the claimed invention except for the first and second binding points lies between 170mm and 210mm. it would have been obvious to one having ordinary skill in the art at the time the invention was made to invent a first and second binding points that lie between 170mm and 210mm, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art.

Art Unit: 3618

Regarding claim 3, Borel discloses the claimed invention except for an increase comprised between 3% and 27%. It would have been obvious to one having ordinary skill in the art at the time the invention was made to invent a first and second binding points that lie between 3% and 27%. Since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art.

Regarding claim 4, Borel discloses the claimed invention except for four wheels having a diameter of 100mm. It would have been obvious to one having ordinary skill in the art at the time the invention was made to formulate wheels having a diameter of 100mm, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.
